

holistic connections mail service (hcms): Advanced community content maintenance via mailing

You want to get the most use out of IBM Connections, and guarantee the best use and knowledge transfer for your teams and projects.

Be successful with the tools from holistic-net!

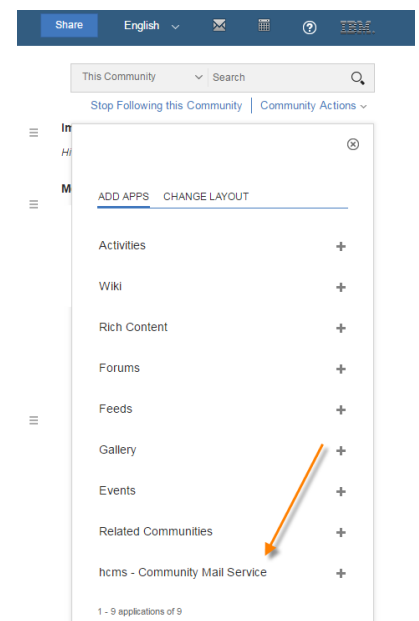

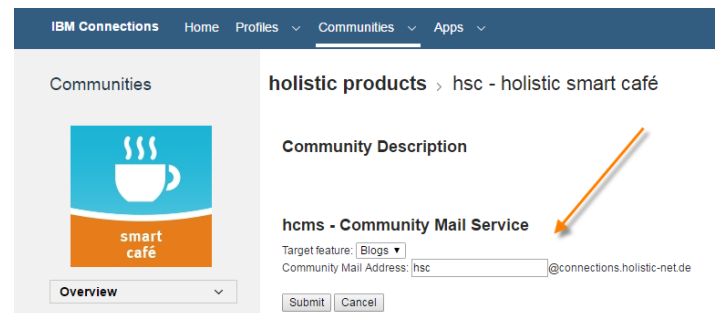

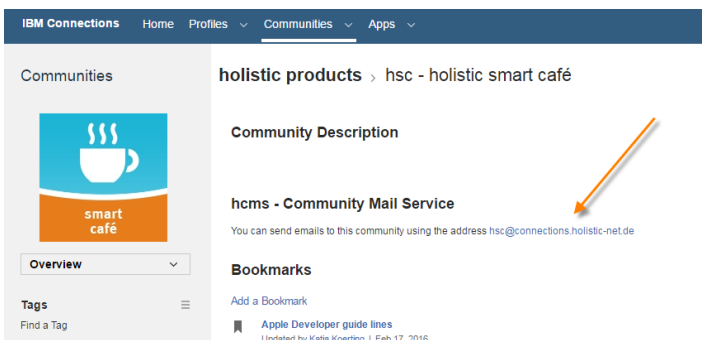

hcms Advantages:

- Easy distribution of information in your company
- No further uploading of file attachments in IBM Connections
- Application of user authorizations to comply with security mechanisms
- Protection from illicit emails through authorization processes
- Solely community members are authorized to send e-mails to the community
- Simple hcms installation on the IBM Connection Server

hcms Benefits:

- Emailing and information distribution in the community in one step
- Incoming customer e-mails can be forwarded easily
- Connection between mail text and file remains -> blog entry with file link
- And much more

- ### hcms Possibilities:
- **holistic connections mail service** provides a convenient e-mail activation through the application in the communities
 - Generation of blog entries with corresponding mail text
 - Attachments are uploaded in the community app files
 - Files are connected with the blog-entry via link
 - Community owner decides if the community is permitted to receive e-mails
 - Authorized users are able to send e-mails from any mail server to the community
