hc²e Benefits:

- Personal backups and archives of the communities you own.
- Quickly locate community content with the help of a fast and easy navigation.
- Manually or automatically export community data.
- And much much more.

hc²e Possibilities:

holistic connections content export

... offers targeted export functionality for IBM Connections community contents into a static HTML format including Attachments.

... offers the ability to filter content ...

   ... by community name.

   ... by community owner or member.

   ... tags and keywords.

... shows whether the different community features have content.

... uses different connection profiles to offer access to multiple IBM Connetions installations.

... quickly lists the members and their roles in any given community.

... uses type-ahead to allow quick searches of communities.

... opens live content quickly over a browser with a simple click.
