

application management

Management of company-wide

HCL Domino/Notes application landscape

Optimal overview reduces costs and empowers ability to make decisions!

Manage your dynamic application landscape efficiently and present all information in a company-wide application portal based on HCL Notes/ Domino.

holistic application management (ham) offers the right platform for this challenge.

- Manage and design your company-wide Domino/Notes application landscape in a performance-oriented, high efficient, cost-saving and transparent manner.
- Use the tool for assessments as a basis for migration projects.
- Calculate your IT costs automatically and link them to a cause-based cost allocation.

holistic application management combines technical data on the applications, which are imported periodically and dynamically, with

metadata that can be partly generated automatically or added manually. Provision of data enterprise-wide is handled by an integrated information portal.

Dynamics, complexity & intransparency are increasingly characterizing today's IT infrastructure:

- Historically grown application landscapes often lack in transparency.
- The lack of transparency refers to usage and distribution, responsibilities and operating costs.
- Mergers, divisionings, integrations or outsourcing of companies or organizational units constantly change the application landscape.
- Dynamic growing application landscapes have to be managed in a targeted and appropriate manner, further development is needed, a continuous cost/benefit check is required.

Project situations with optimal support by ham:

- Platform changes
- Migrations
- Consolidations
- Corporate Mergers
- Server relocations
- etc.

holistic application management - Phase model

	Phase 1	Phase 2	Phase 3	Phase 4	Phase 5	Phase 6
User			++	++	++	+++
Auditor						+++
Controller					++	+++
Developer		+	+	++		+++
IT-Manager			+	+++	++	+++
Application owner		+	+++	++	++	+++
Administrator	++	++	+	+	+	++
	Installation and initial inventory	Administrative Cleanup	Metadaten Supply	Content Cleanup + Decision Platform	Accounting	Continuous optimization and operations
