

connections content export

Content Export of HCL Connections by holistic connections content export (hc2e)

The holistic connections content export offers, based on keywords or tags, the targeted export of content from HCL Connections communities into static HTML including attachments/files with the option of filtering...

... on a defined selection of communities.

... on communities, in which certain users, are owners or members.

... using keywords or tags.

hc2e Advantages and Benefits:

- Saving storage and archiving key files and HCL Connections community content
- Easy Installation
- Instant results without the expenditure of time configuring the application.
- International deployment supported by multi linguism.
- No security considerations since the rights of the current user are used. See only what you're allowed.
- Personal backups and archives of the communities you own.
- Quick & easy navigation locates community content effectively
- Manual or automatical export of community data.
- And much, much more.

hc2e Possibilities:

holistic connections content export ...

... offers targeted export functionality for HCL Connections community contents into a static HTML format including Attachments

... offers the ability to filter content
... by community name
... by community owner or member
... tags and keywords

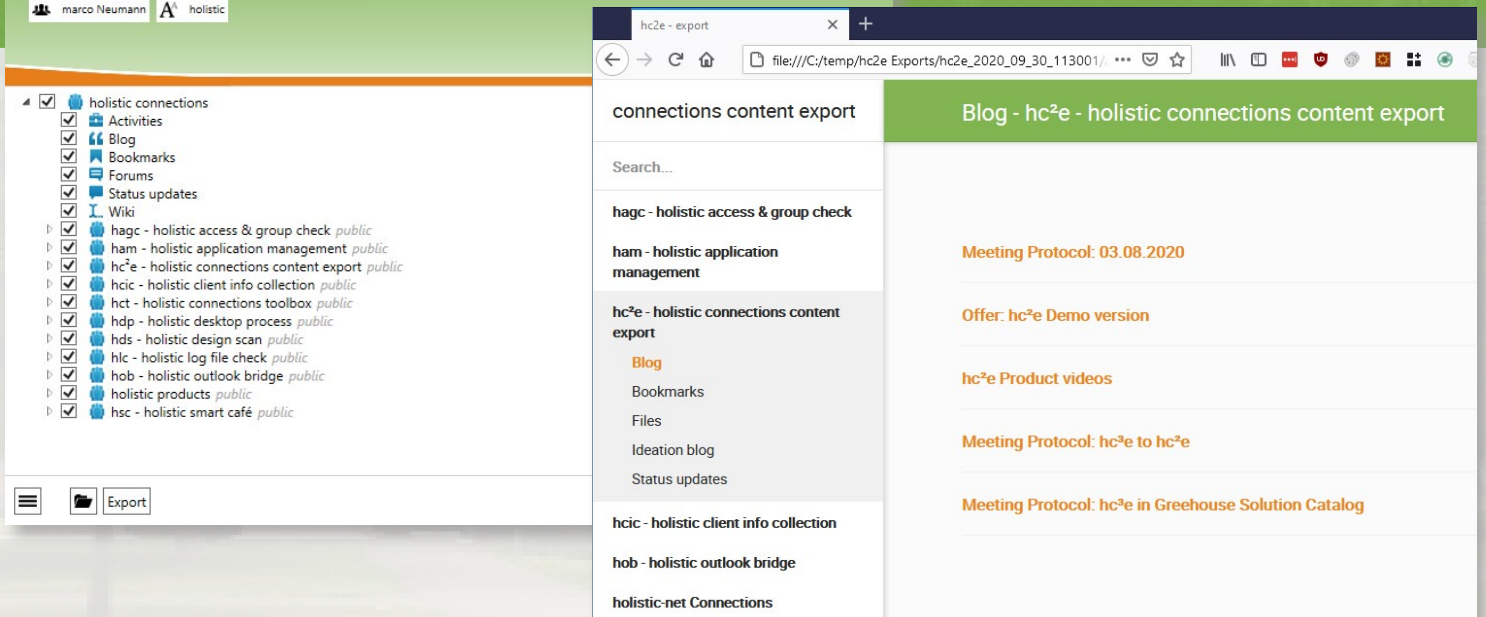

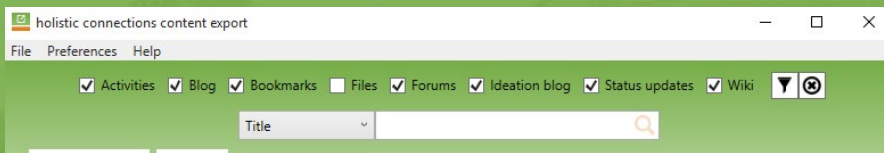

... shows whether the different community features have content

... uses different connection profiles to offer access to multiple IBM Connections installations

... quickly lists the members and their roles in any given community

... uses type-ahead to allow quick searches of communities

... opens live content quickly with a simple click in web browser.
