

## The gateway to the PowerShell

**holistic powershell launch center (hplc)** is the answer to the challenge faced by many companies to operate their own system landscape efficiently, in a controlled manner and above all with sufficient security.

### hplc ...

- ... controls the system settings of various target systems from ONE role-based web application
- ... uses full range of services from MS PowerShell
- ... is equipped with an extensive collection of PowerShell scripts for application to modern target systems
- ... enables self-service scripting
- ... has scheduling functionality
- ... offers the possibility for delegation

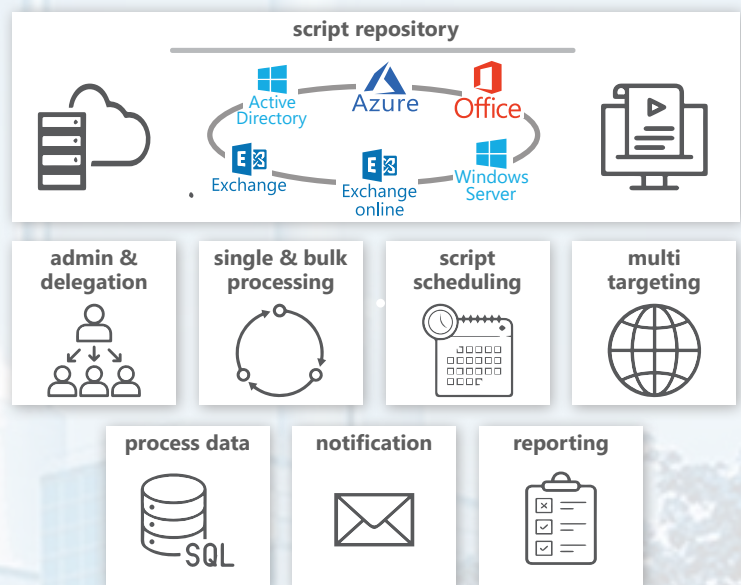

### hplc Advantage and Benefit

- Applicability to the most important current and future target system platforms
- PowerShell & target system skills are not required
- Avoidance of incorrect settings with all adverse consequences
- Creation of resource redundancy through delegation
- Increased efficiency without security risk
- Reduction of the Total Cost of Ownership

holistic powershell launch center is the solution to deploy system administration staff more efficient, to act faster, with more flexibility and minimized risks in daily system administration.

### Important use cases with security needs

- Implementation of the Active Directory processes for on- and offboarding of users
- Individual and mass management of AD objects, such as resources, personal and shared mailboxes, groups and other objects
- Monitoring and reporting
- Management of Windows Services

**„System administration can be so simple“**
